

**New Castle County Cooperative Extension Master Gardeners  
Announce a New Workshop for the Home Gardener**

How did your garden grow this year? A so-so performance may mean you could use more help from nature's pollinators - hummingbirds, bees, bats, butterflies and beetles. Learn how pollination takes place and how to attract native pollinators to your garden, and you'll reap bountiful awards through increased yields from vegetable and fruit crops.

**Thursday, November 5  
7:00 to 9:00 PM  
University of Delaware  
New Castle County Cooperative Extension**

***Lead Instructor: Peg Baseden***
